

Postdoctoral Opportunity in Plant Evolutionary Genomics - Juan de la Cierva Program!

Did you earn your Ph.D. in genomics, bioinformatics, omics data science, or related disciplines between January 1, 2024, and December 31, 2026?

Are you passionate about evolutionary biology and solving biological problems with computational tools?

Would you like to uncover the secrets hidden within the genomes of neglected plant species—key to sustaining agricultural production and ensuring food security under climate change? 

The “*Plant Evolutionary Genomics*” lab at the University of Almería (Spain) is looking for outstanding candidates to apply for a 3-year postdoctoral contract under the prestigious “Juan de la Cierva” 2026 program (Ministry of Science, Innovation, and Universities).

If you meet the eligibility criteria of the call (<https://lnkd.in/eHfDOdZv>), please send your CV / expression of interest to:

Email: lpaulet@ual.es.

Deadline: November 10, 2026.
