

Recruitment of an INSERM Chair of junior professor at the IRCM of Montpellier

Deadline for submission of applications is February 14, 2022.

The Montpellier Cancer Research Institute, IRCM U1194 (ircm.fr) is one of the 8 French laboratories that will benefit in 2022 from a **junior Professor tenure-track position funded by INSERM (CPJ, <https://sp2013.inserm.fr/sites/eva/appels-a-projets/cpj/Pages/default.aspx>)**.

The duration of the initial tenure track Professors' employment contract is six years, after which a permanent position as INSERM Research Director (Career track, Research) may be offered depending on successful fulfilment of predefined criteria and evaluation by an INSERM tenure committee. The CPJs open at INSERM are intended for researchers with a strong potential to manage and lead a research team, as well as to participate in national, European or international projects.

The research and teaching project in **cancer biology** will be developed within the IRCM U1194 on the campus of the Montpellier cancer hospital (ICM) and at the University of Montpellier, respectively. The position is awarded with a research package and with a teaching service of approximately 40 hours / year. (provided either in French or English).

The research project will aim to strengthen IRCM expertise in the **analysis and therapeutic targeting of the tumor microenvironment, with special emphasis on primary or metastatic brain tumors** (https://sp2013.inserm.fr/sites/eva/appels-a-projets/cpj/Documents/Fiche_projet_CPJ_Montpellier_IRCM-U1194.pdf).

The selection of the candidate will be made by an independent committee set up by INSERM and the University of Montpellier.

For information, please contact the IRCM U1194: direction.ircm@inserm.fr
