

# IMPERIAL

## Postdoctoral Research Associate position available

We are looking for a highly motivated and talented **postdoctoral researcher** with a strong background in molecular biology to join the **Martinez-Sanchez** research group at **Imperial College London**.

Are you interested in how **microRNAs work at the single-cell level**?

Do you want to understand the molecular mechanisms controlling **beta-cell function** in health and disease?

Would you like to use **cutting-edge research techniques** to advance **type 1 diabetes** therapies?

Would you like to lead a **highly collaborative project** and work with three different research teams at UK (Martinez-Sanchez; Srivastava (ICL, London) and Germany (Rodriguez-Calvo, Helmholtz Munich)?

Would you thrive in a **supportive environment** committed to mentor early career scientists?

If so, look for the full job description and apply in [this link](#) by 08/12/24 or access <https://www.imperial.ac.uk/jobs/> with Job Reference: MED04923

For informal enquiries, don't hesitate to contact *Dr Aida Martinez-Sanchez* ([a.martinez-sanchez@imperial.ac.uk](mailto:a.martinez-sanchez@imperial.ac.uk))
