

1 Postdoctoral & 1 Ph.D. open positions

Molecular infection biology approaches to develop new strategies to fight antibiotic-resistant MRSA infections.

We invite applications for 1 postdoctoral and 1 Ph. D. position (4 years) in the Molecular Infection Biology laboratory at the CNB (Madrid, Spain). The research project focuses on characterizing a cellular mechanism located at the al membrane microdomains (FMM) of the multi-drug resistant human pathogen MRSA, its role in virulence and its potential as a target to fight MRSA infections. Applicants should have a strong background in molecular microbiology or cell biology.
